

Softrol™ Series

*Reduce Scale Build Up in Pipes,
Appliances and Glassware*

Puretec®
PERFECTING WATER

WATER TREATMENT

Softrol™

Protect your Home with Puretec Softrol™

Hard water is water that contains dissolved minerals such as limestone, iron, sulphur, magnesium, and calcium. If these minerals are not reduced from your water, they will cause scaling, eventually blocking plumbing and shortening the life of appliances, particularly hot water units, dishwashers, washing machines, etc.

SOFT WATER BENEFITS FROM A SUPERIOR WATER SOFTENER APPLIANCE

Use less detergents. Clean bathrooms and dishes more easily. Reduce scum, towels and linen are softer and appliances last longer. The benefits are almost endless, and shouldn't be underestimated.

INSIST ON A WATERMARK CERTIFIED SOFTENER

The Softrol™ system is manufactured to stringent standards.

WaterMark Certification confirms that the product complies with the Plumbing Code of Australia and the relevant Australian standards. This relates to product quality, including health and safety and warrants that the product is fit for purpose.

LUXURIOUS WATER

With Puretec Softrol™ your silverware and glassware will appear cleaner and shinier. Your hair and skin will feel softer, also helping with some cases of eczema.

LONGEVITY

Minerals found in hard water build up in household appliances, such as hot water systems and dishwashers reducing their service life and making them less efficient. Soft water saves you money by replacing them less often and the environment by cutting waste. The products have been tested in the harshest environment and every Puretec Softrol™ comes with a Six Year Warranty.

EFFICIENCY

Water softened with a Puretec Softrol™ water softener appliance heats up faster. This saves on power and gas consumption at a largely reduced rate. An estimate of up to 22% for electric hot water systems and up to 30% for gas hot water units*.

FUNCTIONAL CONTROLLER

Solid-state microprocessor with easy access front panel settings. Backwash controller has less moving parts for reliability.

PRE-FILTRATION

Combine your Softrol™ with a whole house pre-filter to extend the life of your water filter plus also reduces chlorine & sediment to give you great tasting water to every tap in your house. Pre-filtration will protect the resin in your water softener to increase its working life and reduce your ongoing maintenance costs.

Softrol™ Series

*Saves Water, Time and Money**

SOL30-E3 **AUTOMATIC VOLUME**

The SOL30-E3 is designed for small to medium sized houses with a service flow rate of 30 Lpm. The SOL30-E3 has an integrated water meter and automatic capacity calculator allowing automatic regeneration once the capacity is reached.

SOL40-E1 **AUTOMATIC TIMER**

The SOL40-E1 requires less maintenance than most water softeners. Simply set the time & date for backwash and the unit regenerates automatically. The SOL40-E1 has a service flow rate of 40 Lpm.

SOL30-E1 **AUTOMATIC TIMER**

The SOL30-E1 requires less maintenance than most water softeners. Simply set the time & date for backwash and the unit regenerates automatically. The SOL30-E1 has a service flow rate of 30 Lpm.

Commercial grade water softeners also available

Features & Benefits

Softrol™ Benefits Around your Home

STATE-OF-THE-ART E3 VALVE (E3 model only)

If no water is used, it won't backwash. When it does, according to the water volume used and water quality, it will choose a convenient time when water generally isn't used.

USER FRIENDLY, FUNCTIONAL CONTROLLER

Solid-state microprocessor with easy access front panel settings. Backwash controller has less moving parts for reliability.

EASY LID ACCESS

Functional lid design keeps the dirt out and a large opening means easy topping up of the brine tank.

WATER, ENERGY AND MONEY SAVING (E3 model only)

Integrated water meter monitors usage for precise regeneration and efficient salt usage. Backwash controller has less moving parts for reliability and durability.

HIGH GRADE PREMIUM RESIN

This means less regeneration needed, higher capacity per unit and longer resin life.

DURABLE CABINET

The cabinet is UV stable and has been designed for Australian Weather Conditions.

SERVICE KIT

Service kit available. A little bit of maintenance goes a long way in ensuring you get the best performance from your Water Softener and the longest life. Add a WTV4400 service kit to your order.
